

APPALA BHARATH

✉ appalabharath2005@gmail.com —  [LinkedIn](#) —  [GitHub](#) — ☎ +91 8309828941 — Hyderabad, Telangana

PROFESSIONAL SUMMARY

A passionate and detail-oriented AI & ML undergraduate with hands-on experience in backend development and machine learning applications. Skilled in building REST APIs, dashboards, and practical ML models. A strong collaborator and problem-solver seeking opportunities in software development or AI/ML roles.

EDUCATION

Anurag University — B.Tech Artificial Intelligence & Machine Learning	2023–Present — 8.8
Sri Chaitanya Junior College — Intermediate (MPC)	2021–2023 — 92%
Paramita Heritage School — CBSE	2020–2021 — 71%

EXPERIENCE

Python Developer Intern — CodexIntern / Oct 2025, 3 months  [GitHub](#)

- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA) using Pandas, NumPy, Matplotlib, and Seaborn.
- Built and evaluated Machine Learning models including Random Forest and Linear Regression for a House Price Prediction system.
- Designed a user-oriented application that predicts housing prices based on key features, improving model performance through data cleaning, model tuning, and visualization techniques. ([Live Demo](#))

PROJECTS

AI Smart Agricultural Assistant  [GitHub](#)

Developed an AI-based farming support system that uses CNN for plant disease detection, Decision Tree for fertilizer recommendation, and Random Forest for crop yield prediction. Implemented data preprocessing, feature engineering, and model training using Python libraries such as TensorFlow/Keras, Scikit-learn, Pandas, and NumPy, and built a user-friendly application that provides intelligent farming insights based on crop images and agricultural data. ([Live Demo](#))

Groundwater Prediction System  [GitHub](#)

Developed a machine learning web application using Streamlit to predict groundwater levels based on environmental factors such as rainfall, temperature, and soil moisture. Implemented Random Forest and Linear Regression models for prediction, performed data preprocessing and feature analysis using Pandas and NumPy, and integrated data visualization for model performance and feature importance, enabling users to input parameters and obtain real-time groundwater predictions through an interactive interface. ([Live Demo](#))

SKILLS

Languages	C, Python, Java
Frontend	Angular, HTML5, CSS3, TypeScript
Backend	Node.js, Express.js, REST APIs
Databases	MySQL, MongoDB
Tools	GitHub, VS Code, Antigravity, AutoCAD, Excel, Postman

CERTIFICATIONS

- NPTEL– Data Structures / Algorithms using Python, Programming in Java
- Oracle– Generative AI Certification
- HackerRank– Python (Basic), Problem Solving

ACHIEVEMENTS

- Participated in multiple hackathons, collaborating in team-based problem solving and rapid prototype development. Secured 2nd and 3rd prizes in competitive hackathon events for innovative technical solutions.
- ISTE Member: Participated in AI, ML, and web development workshops.
